Bio

Howdy! I am the first-year PhD student at The University of Texas at Austin  , advised by **Prof. Mingyuan Zhou**. I received my M.S degree from Xidian University in 2024, advised by **Prof. Bo Chen**. Previously, I obtained my B.S degree from Xidian University in 2021. \ \ \ **My research interests** lie in the general area of probablistic modeling, particularly in solving real-world problems through advanced Generative AI systems. My recent research focuses on how to push a model's capability boundary beyond its own limits through distillation techniques.

If you share the same research interests with me, feel free to reach out or add my .
